

Manager IT Development

Telecom Foundation is seeking an experienced manager of information technology with expertise in Odoo to join our team. As the Manager of IT Development, you will be responsible for overseeing and leading various IT development activities. Your responsibilities will include, but are not limited to, the following:

Responsibilities:

- Lead the development and customization of Odoo modules using Python, SQL, and other relevant programming languages.
- Create and maintain website/web-portal layouts, designs, content. Review, proofread, and evaluate website/web-portal.
- Develop technical vision for web applications, including integrations with business processes and APIs
- Identify opportunities for increasing efficiency and effectiveness of web systems, and recommend and implement solutions
- Identify and address discrepancies in how developers work
- Plan, organize, control, and evaluate IT operations, employing project management software like Jira, Confluence, and other suitable tools.
- Design, develop, implement and coordinate IT systems and procedures, leveraging different operating systems such as Linux, Windows, etc.
- Design and Develop ODOO apps (new module development and customization).
- Create low level requirement document in discussion with different teams.
- Follow best practices in Software development to ensure the readability and maintainability of the code.
- Supervise the design and deployment of networks to ensure optimal functionality and performance.
- Ensure software security by utilizing code review tools, vulnerability scanners, and other relevant security software.
- Provide training to employees on IT systems and applications, including the utilization of eLearning platforms.
- Stay up to date with the latest IT trends and technologies, incorporating relevant advancements into the organization's IT strategies.
- Perform routine preventive maintenance on hardware and software.
- Maintain databases and desktop/web applications.
- Develop new systems as needed, employing agile development methodologies such as Scrum and Kanban.

Eligibility Criteria:

To be eligible for the role of Manager IT Development, candidates must meet the following requirements:

- Minimum bachelor's or higher degree in IT/Computer Science/Computer Engineering/Software Engineering or a related field from an HEC recognized University/institute.
- Minimum of 6 years of working experience in a related field for candidates with a master's or higher degree. Minimum of 8 years of working experience for candidates with a bachelor's degree.
- Preference will be given to the candidates who have hands-on experience in developing the websites/web-portals.
- Candidates having experience of development in PHP, WordPress and APIs will be preferred.
- Proven knowledge of Python, PHP, WordPress and OOP concepts.
- Hands on expertise of Odoo ERP implementation, customization, basic flow, data models and migration from earlier versions of ODOO to new versions.
- Proven expertise in data center management and data governance, ensuring efficient operation and security of data systems.

Candidates should submit their responses at:
